

# Job Application Generation Report

---

**Generated on:** 2025-06-25T04:14:21.745296

**AI Provider:** sample (content)

**Output Folder:** sample\_content

---

## Generated Documents

---

This folder contains a complete German job application generated using AI:

-  **anschreiben.md** - Cover letter (Anschreiben)
  -  **lebenslauf.md** - CV/Resume (Lebenslauf)
  -  **anlagen.md** - Attachments list (Anlagen)
  -  **pdf/** - PDF versions of all documents
  -  **generation\_info.json** - Technical metadata
  -  **generation.log** - Detailed generation log
- 

## Reproduction Instructions

---

To regenerate this exact application with the same configuration:

### Quick Start

```
# Linux/macOS
./regenerate.sh
```

```
# Windows
regenerate.bat
```

### Manual Reproduction

```
# Set environment variables
export AI_PROVIDER="sample"
export OUTPUT_STRUCTURE="by_model"
# No additional environment variables needed

# Navigate to project root and run generation
cd /Users/setzt/work/claude-code/Bewerbung
make generate
```

---

## Input Files Used

---

- **Profile:** 20250604\_dr\_setz.pdf
  - **Job Description:** 20250624\_61383\_SeniorDevOpsEngineer.txt
  - **Generation Method:** AI generated (may use cache)
- 

## AI Content Analysis

---

Content Type	Characters	Words	Description
Einstiegstext	284	35	Opening paragraph introducing interest

<b>Total</b>	<b>1,267</b>	<b>160</b>	<b>Complete application</b>

### Content Quality Indicators

- **AI Provider Available:**  Yes
  - **Content Cached:**  Yes (from previous generation)
  - **Generation Time:** Unknown
- 

## System Requirements

---

### Required Dependencies

```
# Python packages
pip install -r requirements.txt
```

```
# System dependencies (for PDF generation)
brew install pango
```

### AI Provider Setup

#### Sample Content:

No additional setup required. Uses built-in sample content.

---

## System Information

---

- **Operating System:** Darwin 24.5.0

- **Python Version:** 3.12.8
  - **Generation Host:** Drs-MacBook-Pro-4.local
  - **Working Directory:** /Users/setzt/work/claude-code/Bewerbung
- 

## Troubleshooting

---

### Common Issues

#### AI Provider Not Available

```
# Check AI provider status
make test-providers

# Install missing dependencies
pip install anthropic # For Claude
# OR install Ollama for local Llama models
```

#### PDF Generation Failed

```
# Install system dependencies
# macOS: brew install pango
# Ubuntu: sudo apt-get install libpango-1.0-0 libharfbuzz0b libpangoft2-1.0-0
```

#### Permission Denied on Scripts

```
# Make regeneration script executable
chmod +x regenerate.sh
```

### Validation

To verify this generation matches the original:

```
# Run regeneration test
python tests/test_regeneration.py --target="sample_content"
```

---

## Quality Metrics

---

- **Content Completeness:** 100%
  - **Template Coverage:** 5/5 sections generated
  - **File Generation:**  Success
-
